

SEUNGMAN CHOI

Ph.D. Candidate, Purdue University
1205 W State St, West Lafayette, In 47907
Email: choi846@purdue.edu

EDUCATION & WORKING

Purdue University

PhD. in electrical and computational engineering (GPA 3.94/4.00)

Advisor: [Zubin Jacob](#)

Super-resolution imaging through adaptive information mining [6,9–12,14].

Computational imaging detection and ranging (CIDAR) [15].

West Lafayette, IN

Aug 2022-May 2027 (expected)

Korea Advanced Institute of Science and Technology (KAIST)

Research associate in Mechanical engineering

Advisor: [Seung-Woo Kim](#), [Young-Jin Kim](#)

EUV tool development for semiconductor inspection [3–5,8].

Daejeon, KR

Apr 2019- Aug 2022

Tokyo Institute of Technology (Ti-tech)

M.S & B.S in Mechanical Engineering (Magna Cum Laude)

Advisor: [Nisisako Takasi](#), [Shigeki Saito](#)

Scaled-up Microfluidic device using semiconductors manufacturing technique [7,13].

Advanced gripping system for semiconductors with complex shapes [1,2].

Tokyo, JP

Apr 2013- Mar 2019

HONORS, AWARDS & GRANTS

[13] Bilsland Fellowship	Jan 2027–Mar 2027	[6] Best Paper Award	Nov 2021
Purdue University, \$31,000 for a semester, US.		Next generation lithography conference (2021OSK), KR.	
[12] DARPA CIDAR Semifinal Winner	Jan 2026	[5] Excellence Presentation Award	Feb 2019
Zetascope, \$50,000 team award , US. Core member; closest final-round result to DARPA's winning criteria.		2019KSEAJ, JP.	
[11] Outstanding Presentation Award	Feb 2025	[4] ITO scholarship	Apr 2017–Mar 2019
The 10th 2025NCC, KR.		ITO Foundation for International Education Exchange, JPY 180,000 per month, JP.	
[10] Outstanding Presentation Award	Nov 2024	[3] Tour grant	Aug 2018
Autumn 2025KSPE, KR.		The Precise Measurement Technology Promotion Foundation (PMTF-F), JPY 197,000 once, JP.	
[9] Best Presentation Award	May 2023	[2] MutoEiji academic excellence award	Mar 2017
The 18th 2023IEEE-NEMS, KR.		The Japan Society for Design Engineering (JSDE), JP.	
[8] Best Paper Award	Nov 2022	[1] KR-JP joint scholarship	Apr 2013–Mar 2017
The 9th 2022ASPEN, SG.		Korea and Japan Government, JPY 130,000 per month, KR&JP.	
[7] Bronze Prize	Nov 2022		
Autumn 2022KSME, KR.			

PREVIOUS RESEARCH INTERESTS

Keywords: Computational adaptive optics, information-optimal sensing, aperture-synthesis, computational imaging, physics-informed learning

Information-optimal computational imaging

Design optical measurements to maximize useful information under physical constraints.

- **Optimal sensing:** Co-design optical encoding and apertures for inference.
- **Adaptive measurements:** Reconfigure sensing to the scene, aberrations, or task.
- **Physics-informed decoding:** Combine wave optics with compact learned models.

Computational adaptive optics

Recover high-resolution scenes and dynamic aberrations from coded measurements.

- **Aberration correction:** Estimate turbulence and system aberrations from intensity data.
- **Spatiotemporal inference:** Exploit spatial and temporal structure of evolving wavefronts.
- **Compact modeling:** Represent aberrations with physical bases and lightweight networks.

SKILLS

Programming language	Python, Matlab and LabView
Optical system design	Vacuum, microscopic and astronomical telescopic optical system
Computational algorithm	Coherent diffraction imaging (Ptychography), double blind-deconvolution, deep image prior and genetic algorithm.
Clean room nanofabrication	Deep reactive-ion etching and photo-lithography
