SEUNGMAN CHOI

Ph.D. Candidate, Purdue University
1205 W State St, West Lafayette, IN 47907
Email: choi846@purdue.edu

EDUCATION & EXPERIENCES

2022.08–Present Ph.D., Purdue University, USA
- Advisor: Prof. Zubin Jacob
- Projects: Super-resolution imaging [6, 9–12, 15], and computational imaging for detection and ranging [14].

2019.04–2022.08 Research Associate (military duty), KAIST, KR
- Advisors: Prof. Seung-Woo Kim and Prof. Young-Jin Kim
- Project: Controllable EUV/DUV sources for semiconductor inspection [3–5,8]

2017.04–2019.03 M.S., Tokyo Institute of Technology, JP
- Advisor: Prof. Nisisako Takasi
- Project: Scaled-up microfluidic device [7, 13]

2013.04–2017.03 B.S., Tokyo Institute of Technology, JP (Magna Cum Laude)
- Advisor: Prof. Saito Shigeki
- Project: Electrostatic gripping system for nonplanar components [1, 2]

HONORS, AWARDS & GRANTS

2027.01–2027.05	Bilsland Fellowship (Pre-selected), $31,000 for a spring semester, Purdue University, USA
2026.01	CIDAR Semifinal Winner, DARPA, $50,000 awarded to the Zetascope team; core member, USA
2025.02	Outstanding Presentation Award, 10th 2025NCC, KR
2024.11	Outstanding Presentation Award, Autumn 2024KSPE, KR
2023.05	Best Presentation Award, 18th 2023IEEE-NEMS, KR
2022.11	Best Paper Award, 9th 2022ASPEN, SG
2022.11	Bronze Prize, Autumn 2022KSME, KR
2021.11	Best Paper Award, Next Generation Lithography Conference (2021OSK), KR
2019.01	Excellence Presentation Award, 2019KSEAJ, JP
2017.04–2019.03	ITO Scholarship, ITO Found, JPY 180,000 per month, JP
2018.08	Tour Grant, PMTP-F, JPY 197,000 once, JP
2017.03	Muto Eiji Academic Excellence Award, JSDE, JP
2013.04–2017.03	Korean–Japan Joint Government Scholarship, JPY 130,000 per month, KR&JP

RECENT RESEARCH PROJECTS

- **Diffraction-limited On-sky Imaging through Turbulence at McDonald Observatory (2025.11.24–12.03, 9 nights):** On-sky observations to demonstrate rapid, few-frame diffraction-limited imaging through atmospheric turbulence.
- **Super-resolution On-sky Imaging for Exoplanet Survey at WIYN Observatory (2026.05.20–22; Director's discretionary time, 1 night):** Initial on-sky observations to demonstrate sub-diffraction-limit resolution in binary-star imaging.
- **Computational Imaging for Detection and Ranging (Dec. 2024–May. 2026):** Analysis of DARPA-provided datasets to validate passive ranging over kilometer-scale distances without active illumination.
- **Polarization-resolved Computational Imaging for Semiconductor Inspection (Ongoing):** Developing defect detection methods by analyzing polarization-dependent responses of local electromagnetic modes in subwavelength semiconductor structures.

SKILLS

Programming languages	Python, MATLAB, and LabVIEW
Optical system design	Vacuum-based optical systems, microscopy, and astronomical instrumentation.
Computational methods	Coherent diffraction imaging (ptychography), blind deconvolution, deep image prior, and genetic algorithm.
Theory & Modeling	Estimation theory, information theory, quantum parameter estimation, and statistical noise modeling
Clean room nanofabrication	Deep reactive-ion etching and photolithography
